

PHP/Web developer

Description:

Seeking a PHP/Web developer to help us build and improve upon our existing properties. Ideal candidates will have a deep, practical understanding of PHP, understand the value of test driven development, and work well in a diverse team.

Requirements:

- Experience delivering large, complex, web sites
- Experience refactoring existing code
- Experience hand-coding PHP, CSS, Javascript (jQuery), and (X)HTML
- Experience with the CodeIgniter Framework
- Expertise in cross-browser compatibility
- Knowledge of design patterns, SOA, refactoring and unit testing
- Develop using a Unix platform (OSX or Ubuntu preferred)
- Experience with MySQL or Postgres
- iPhone and other mobile experience a plus
- Drupal experience a plus
- Experience with other web technologies Ruby and/or Python a plus!

The ideal candidate will:

- Have a passion for web standards
- Be interested in their craft and actively participate in the community
- Be self motivated and enjoy working in a small team
- Have experience working with Agile development methodologies (XP, Scrum)
- Follow a self-motivated work process and possesses excellent communication skills
- Value documentation and knowledge transfer
- Have experience with Flash
- Be a fun, interesting, positive addition to our team!

Benefits:

- Work with an experienced, successful, intelligent team
- Competitive salary, health benefits, and retirement plan
- Be an integral part of a growing, fast-paced company where your work will make a true impact

All applicants should submit their resume, a code sample (including a full test suite), and a web based portfolio.
